Blurb

I'm a 20 something year old software engineer with a penchant for web applications. Technology excites me and I love building things that delight others.

Education

B.A.(Mod.), Computer Science
Trinity College Dublin, 2017, First Class Honours.

Experience

Product Engineer   **Apr 2018 - Present**
Intercom, Dublin. Design Systems - built reusable components, patterns, and supporting tooling and live documentation systems to support rapid iteration and accelerate product development lifecycles while maintaining consistency and our high bar for interface, experience, and performance.

Software Engineer   **May 2017 - Apr 2018**
PageFair, Dublin. Shipped code to billions of pageviews per month. Championed Elixir implementations of production components. Designed, built, and provisioned core ad-tech applications and services. Optimised existing infrastructure for cost savings and fault tolerance.

Software Engineering Consultant   **Aug - Nov 2017**
Swrve, Dublin. Built new generalised timeseries data reporting interface systems and consolidated existing reporting functionality.

Software Engineering Intern   **May - Sep 2016**
PageFair, Dublin. Performed in-house research and development, built internal ad-tech tools and performance benchmarks.

Competencies

Very comfortable in a *nix shell, cultivating a wicked set of underlined dotfiles. Fluent in git porcelain with speedy aliases committed to muscle memory. A solid understanding of (and reverence for) CI+CD workflows and production systems.
Recent professional and personal experience with a bunch of tools, most often leaning towards the front end of the web stack: JS (build systems[webpack, broccoli], node, es5+, transpilation, dom apis, performance audits), Ember, CSS (precompilers, autoprefixers, browser support matrices, magic), Web accessibility.
Rusty professional experience with a great deal more: TS, React + Redux, Elixir, Phoenix, Rails, Docker, C, AWS [vpc, cloudformation, r53, ec2(lc, asg, lb), ecs(+registry)], Electron, Phonegap + Ionic, Saltstack, Jenkins(+blue ocean), etc.

Nat. Langs.

English(C2), **Gaeilge**(A2), **Svenska**(A1)   CEFR

Interests

Svenska, Functional Programming, Games(Video & Board), Design Principles.
